*In the matter of: LightSquared Subsidiary LLC Request for Modification of Its Authority for an
Ancillary Terrestrial Component*

**To: The Federal Communications Commission
Re: FCC File Number: SAT-MOD-20101118-00239**

I ask that the FCC quickly approve LightSquared's desired modification of its authority for an Ancillary Terrestrial Component. Fast-tracking LightSquared's request will allow badly needed wireless capacity to enter into the market as soon as possible, which will increase productivity of businesses and reduce prices for consumers, not to mention create much needed jobs.

LightSquared's low rates will also expand wireless access to other customer bases previously priced out of the expensive technology, allowing more Americans to enjoy the benefits offered by broadband. With President Obama and Chairman Genachowski promoting policies that will make broadband universal, LightSquared complements and supports these important goals.

I hope the Commission will support consumer choice by endorsing LightSquared's request.

Respectfully submitted,

**Craig Stevens
